

Zapier

When an agent takes your call, we can pass critical information and data from your custom-built script through Zapier. Zapier then helps automate the key fields pushing to your internal systems. By linking your Answering Service Care account to Zapier, you will be able to save time by automating a process that may have previously been done manually

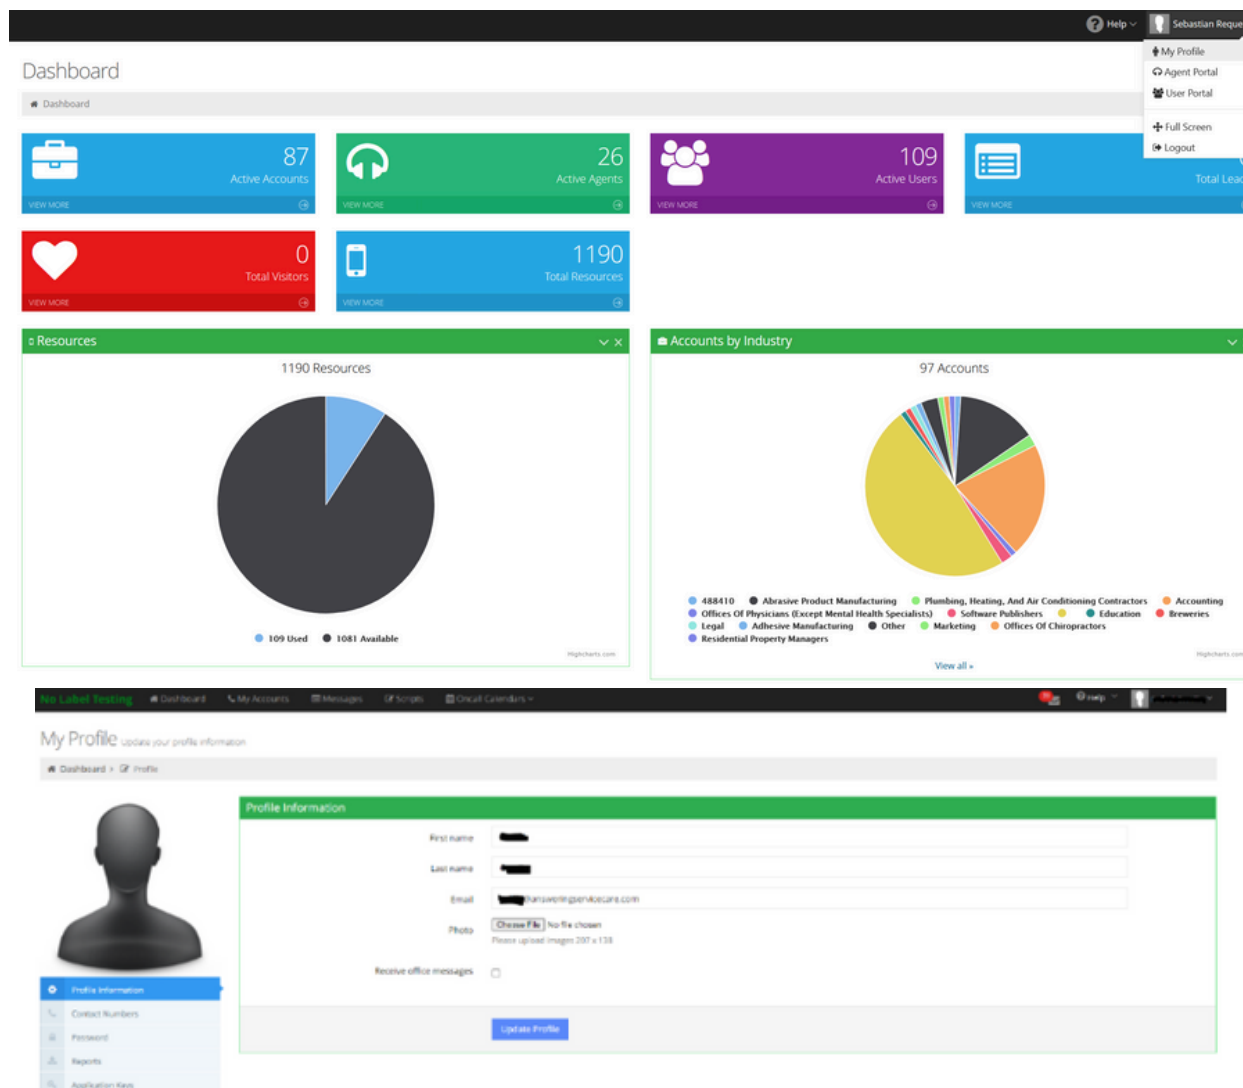

- Save time by automating your message data
- Increase speed to lead
- Reduce Human error
- And more!

How to Connect to Zapier:

Find your API Key

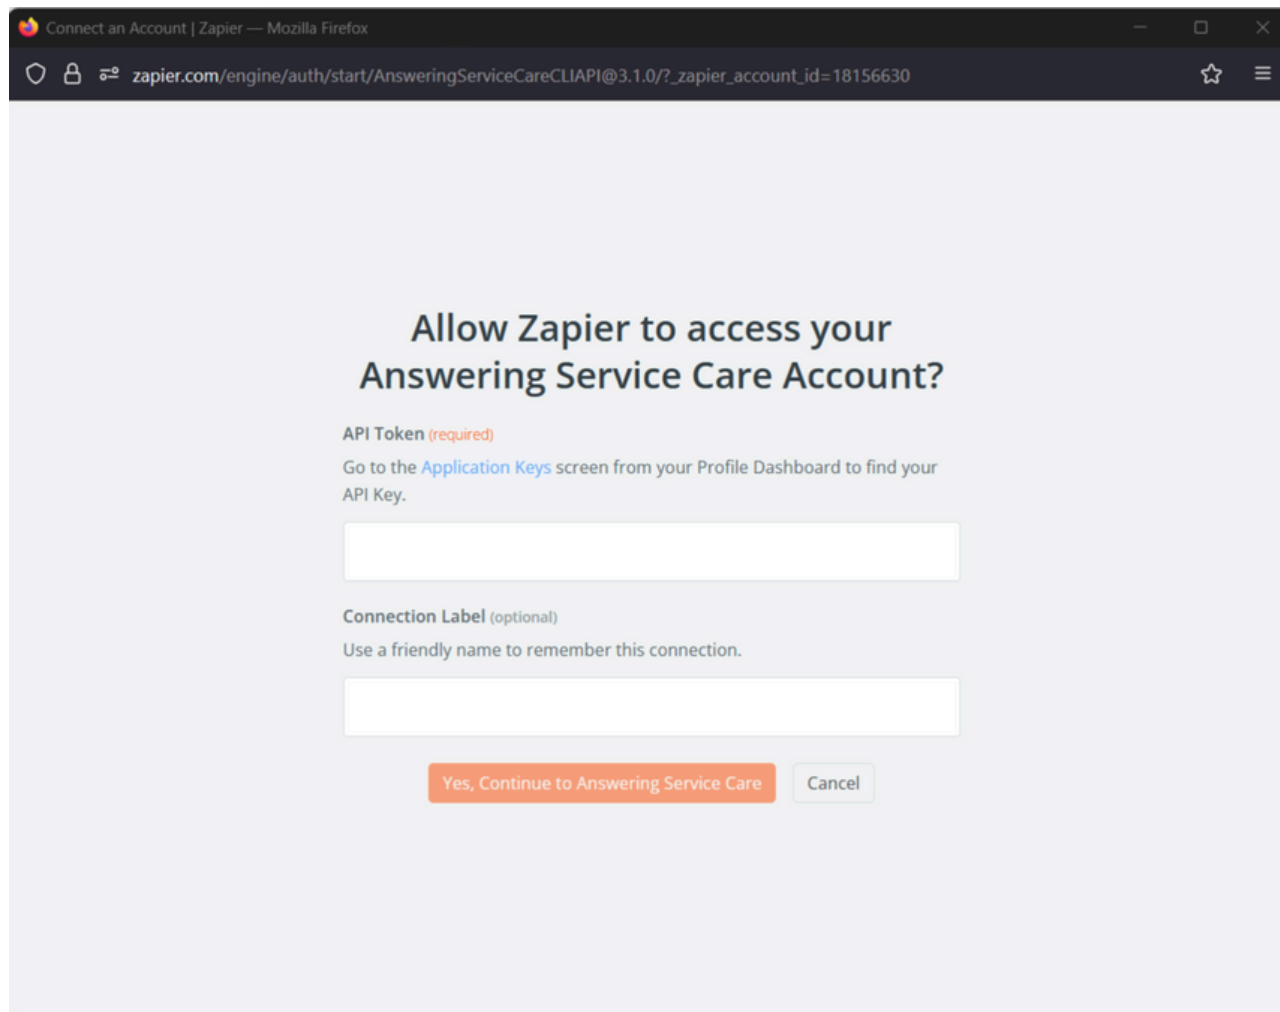

Step 1: Find Your API Token

1. Log in to your [Answering Service Care](#) Account.
2. Click on your name in the upper corner and select **“My Profile”** from the drop-down.
3. Navigate to **“Application Keys”** to copy your API Token.

Step 2: Connect via Zapier

1. Log in or sign up for a free [Zapier](#) account.
2. In Zapier, go to “**Apps**” and click “**Add connection.**”
3. Search for “**Answering Service Care**” and select it.
4. Paste your API Token when prompted. You can now add a custom label to identify the connection.
5. Once connected, start building your **Zaps** using your other favorite **Apps**.

The screenshot shows a web browser window with the title 'Connect an Account | Zapier — Mozilla Firefox'. The address bar displays the URL 'zapier.com/engine/auth/start/AnsweringServiceCareCLIAPI@3.1.0/?_zapier_account_id=18156630'. The main content area has a light blue background and contains the following text:

Allow Zapier to access your Answering Service Care Account?

API Token (required)
Go to the [Application Keys](#) screen from your Profile Dashboard to find your API Key.

Connection Label (optional)
Use a friendly name to remember this connection.

At the bottom, there are two buttons: 'Yes, Continue to Answering Service Care' (orange) and 'Cancel' (gray).
